DETAILED ACTION

This office action is in response to applicant's arguments filed February 8, 2006.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suehiro et al. (U.S. 2003/0002272) in combination with Gary (U.S. 5,903,243).

Suehiro (Fig 3-5B) providing an optoelectronic transducer (2) mounted on a support (16) with inner flat conductors and outer flat conductors ("circuit patterns"; Par.0040); embedding the transducer and the inner flat conductors in a plastic housing (18); and cutting the plastic housing to form a radiation-optical functional surface (Par. 043);

(cl. 2) and the radiation-optical functional surface (29) in alignment (i.e. above) with

transducer.

Suehiro does not explicitly disclose cutting by milling.

Gary discloses the use of milling and thereby cutting¹ a plastic to form a lens (Col. 8, Lines 26-27; Col. 10, Lines 38-40).

It would have been obvious to one of ordinary skill in the art to incorporate milling the package of Suehiro as taught by Gary, in order to provide cutting and a lens as required by Suehiro (Par. 0043; Abstract).

With respect to the intended use limitation of claim 1, such as "for a coupling partner from a material of the plastic housing," the prior art forms the same structure as claimed. As such, the limitation does not impart patentability since it has been held that the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

¹ Higuchi (JP62114249) evidences milling as a form of cutting.

Art Unit: 2813

Claims 3-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose the use of die casting an outer enclosure with a guiding stub, or forming a guiding stub in a mold with the stub being separated from a plastic housing by a separating wall including all the limitations of the independent claim.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James M. Mitchell whose telephone number is (571) 272-1931. The examiner can normally be reached on M-F 8:00-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Whitehead Jr. can be reached on (571) 272-1702. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
